Workshop Description

Workshop Title: The Changing Face of Education - fuelling minds for future focussed learning

Children are growing up in an increasingly technological world. Think back to how much has changed in the last 10 months, let alone the last 10 years and we can not possibly imagine what life will be like for our children by the time they leave school. Technology is an ever-growing part of their lives (our ours) and it is important that it is utilised as a natural part of their learning. In this workshop, Craig will talk about his experience using technology as a tool to engage students in learning and connect them with the world. He will share case studies from schools across the globe, data from global studies to give punchy reasons WHY we need to grow, change and adapt and give practical tips and advice on how to support effective technology integration in your school to create a positive and engaging learning environment in what is the fastest changing environment the world has ever seen. The fourth industrial revolution starts here!!!

Takeaways for audience:

- The critical importance of knowing your WHY
 - Data from around the world that showcases the need to change, flourish and grow as educators
 - Fourth industrial revolution facts for educators backed up by world economic forums growing skills list for 2025 learners
 - How any teacher can change and adapt in their school
- Confidence for Teachers and leaders that it is not hard and practical tips on where to start.
